

Boiler Water Test Kit

Boiler Water Kit

The DTK Boiler Water Test Kit is designed for use in Steam Raising Boilers operating on a treatment programme detailed in BS2486:1997.

Your choice for:

Steam Raising Boilers

The DTK Boiler Water Test Kit should be used to monitor water conditions to ensure that the boiler and other supply water systems are under control and do not exhibit signs of corrosion or scaling.

The tests typically undertaken to control water conditions are Alkalinity p, Alkalinity M & Alkalinity OH, Total Hardness, Chloride, Phosphate, Sulphite, Temperature, pH and TDS/Conductivity.

The Boiler Water test kit is supplied in its own robust carry case and includes all the equipment and reagents necessary to perform between 50 and 200 tests. Replacement reagents and components are available which make this kit a lasting addition to any water treatment professional.

Our test instruction booklet is in full colour and has easy to follow step by step instructions making on site analysis simple. The reagent labels and test booklet are printed on waterproof and chemical resistant paper making them more durable.

The complete kit includes:

- Plastic case with foam
- Waterproof test booklet
- Comparator & 2 x 10ml test cells
- pH & Conductivity stick meters with buffers
- 2 x 65ml test bottles
- Crushing Rod & Cell cleaning brush
- 1 x 10ml & 1 x 20ml luer lock syringes
- 5/10 ml test tube
- 25mm luer lock filter holder
- 25mm GF/C filter papers (50)
- Phosphate HR disk & reagents (0 - 80 ppm)
- Alkalinity p, M & OH drop test (0 - 2400 ppm)
- Total Hardness drop test (0 - 1200 ppm)
- Hardness Stop/Go drop test (0 - 8 ppm)
- Chloride drop test (0 - 3000 ppm)
- Sulphite drop test (0 - 150 ppm)
