

Water Testing

Cooling (Open & Closed) Test Kit Range

Cooling (Open & Closed) Kit

The DTK Cooling (Open & Closed) Test Kit range is designed to provide a custom test kit suited to your needs for use on cooling towers and many types of closed water systems such as chilled water circuits and heating systems.

Your choice for:

- Cooling Towers
- Chilled Water Circuits
- Heating Systems

The range allows for additional tests to be added if required like M & P alkalinities, total & calcium hardness, iron LR & HR, chloride, molybdate, nitrite, phosphonate, aluminium, copper & suspended solids, glycol by refractometer as well as upgrades to a handheld multi-meter and a MD 610 photometer.

Our range of Cooling (Open & Closed) Test Kits are supplied in a robust carry case and include all the equipment and reagents necessary to perform between 50 and 200 tests. The test instruction booklet is in full colour and has easy to follow step by step instructions making on site analysis simple. Our reagent labels and test booklet are printed on waterproof and chemical resistant paper making them more durable and longer lasting.

Parameter	Item Code	COOL001 Level 1	COOL002 Level 2	COOL003 Level 3	COOL004 Level 4	COOL005 Level 5	COOL006 Level 6	COOL007 Level 7
Conductivity		✓	✓	✓	✓	✓	✓	✓
